♻️ RECYCLED CONTENT

♻️ RECYCLABLE

Up to 50% PCR or PIR

INDEVCO Plastics produces environmentally friendly C-Fold Sheeting by using both recycled resins from our in-house PIR scrap and PCR resins sourced from third parties. Additionally, we downgauge film, use less energy, and reduce waste going to landfill. These initiatives help our customers meet their sustainability goals.

INDEVCO Plastics manufactures polyethylene Centerfold Sheeting with up to 30% post-consumer-recycled (PCR), 50% in-house post-industrial recycled (PIR), or 100% virgin resins. Centerfold Sheeting, folded in half and rolled for optimal storage, takes half the space of a single wound film roll. Pre-sealed on one side, this C-Fold Film easily packs products for maximum efficiency with high seal performance and excellent puncture and burst resistance.

Markets

Building Materials, Chemical & Petrochemical, Food, Industrial Salt & Mineral, Lawn & Garden

Centerfold Sheeting Specifications

Product Specs	Lay Flat Width: 14" – 39" Gauge: 2.0 mil – 6.0 mil Material: Polyethylene with 100% virgin resins or up to 50% recycled resins Density: 0.993 kg/cm ³ Capacity: 5lbs -100lbs
Roll Dimensions	Core Options: Fiberboard or PVC Inner Core Diameter: 3"- 6" Roll Diameter: 12" – 48 (custom sizing available)
Product Performance	Flexographic printing: Front-to-back combination up to 8 colors UV Inhibitor 1-year protection Embossing Micro perforations Anti-slip agent Anti-skid agent

Centerfold Sheeting Benefits

Versatility	Adaptive for individual product needs, the diverse gauging and sizing options of Centerfold Sheeting allow it to be used for a variety of applications. Pre-sealed on one side, this C-Fold Film quickly and easily packs products of all shapes and sizes for maximum efficiency.
Package Integrity	Keep product protected from the elements and packaging intact with the excellent puncture and burst resistant properties of Centerfold Sheeting, with optional UV inhibitors adding one-year protection from the sun.
Display Properties	Customize Centerfold Sheeting to your brand needs. Offering line, screen, and process printing up to 8 colors front-to-back, this film delivers vibrant designs using water-based inks. Further customize packaging with varying clarity, gloss, and stiffness properties as needed.
Space Saving	Use more space in warehouse for finished product with Centerfold Sheeting's folded in half design taking half the space of a single wound film roll. The folded roll design takes less inventory space and still yields the same film width as a roll twice it's length.
